## LIVE LEARN GROW

SUMMER IS FINALLY HERE!

Dear Glenrose Community,

Summer is finally here and our long awaited newsletter is back! In the past few months, both our community and the world has been through a lot, but we are hopeful that things will continue to gradually go back to normal. The good news is that at Glenrose, we've already kicked off summer activities! We look forward to everyone getting involved and even encourage residents to suggest activities they'd like to see in the community. We're most excited to announce our partnership with SAVE Institute, who is leading our **Farm Work Days**. Working in the farm provides the community with the opportunities to learn, grow and harvest in our garden. Our **Farm Work Days** directly contribute to our free Farmers Market on Fridays, where residents can pick up produce grown right in our garden! (See last page for full details on **Farm Work Days**.)
